

[Docket No. FR-7077-N-03]

Privacy Act of 1974; System of Records

AGENCY: Office of Administration, HUD.

ACTION: Notice of a Modified System of Records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended, the Department of Housing and Urban Development, gives notice of a proposed revision of an existing Privacy Act system of records. The system of records is being updated in support of a follow-up information collection with the participants of the Homeless Families Impact Study (now called the Family Options Study). The overall goal of the Family Options Study is to determine which housing and service intervention works best to promote housing stability, family preservation, and family well-being, and self-sufficiency for homeless families with children. The new information collected will be added to the existing Homeless Families Impact Study Data Files. The Department proposes to expand the data collected under the previous study to capture additional data to determine the effects that housing and service interventions has had on the young children who are part of the sample. Refer to the “Categories of Records” section to identify new record types. Additionally, this Notice updates the routine uses of the data collected. This notice supersedes the previously published notice (February 26, 2014).

DATES: Comments will be accepted on or before [INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]. This proposed action will be effective immediately upon publication. Routine uses will become effective on the date following the end of the comment period unless comments are received which result in a contrary determination.

SUPPLEMENTARY INFORMATION: HUD launched the Family Options Study in 2008 with the intent of generating evidence about the relative effectiveness of various housing and services interventions designed to address family homelessness. HUD awarded the contract for the Family Options Study to Abt Associates and their partner, Vanderbilt University, who have conducted prior phases of the study and will conduct this next phase of the evaluation. Specific changes to the SORN include:

Changes to categories of records in the system and sources categories. The upcoming follow-up information collection with the participants of the Family Options Study will

include additional categories of records which will be stored as part of the Homeless Families Impact Study Data Files.

Updated routine uses. The routine uses have been updated to remove those which are no longer relevant to this data collection (including the Congressional Inquiries Routine Use, the Department of Justice for Litigation Disclosure Routine Use, the Court or Law Enforcement Proceeding Routine Use, and the Law Enforcement Investigation Routine Use) and to add a new Research and Statistical Analysis Disclosure Routine Use.

Updated the System Location to reflect current addresses of contractors. The contractor has moved offices since the publication of the original SORN in 2014, and thus the System Location has been updated to reflect the current address.

Updated the Purpose to reflect the additional phase of the study. The original SORN was published in 2014 and did not forecast this new followup information collection, thus the SORN is being revised to refer to this additional phase of the study.

Updated record retention and disposal and safeguards sections to reflect current retention requirements and current safeguard procedures. This section has been updated to reflect current record retention requirements and current safeguard procedures.
